Fact Sheet : Understanding Gorilla Traits

Here are some key facts about the traits gorillas inherit from their parents:

1. Fur Color: Gorillas can inherit fur color ranging from black to various shades of brown or gray.
2. Body Size: The size and build of gorillas, including height and muscle mass, can be influenced by genetics.
3. Facial Features: Traits such as the shape of the face, nose, eyes, and ears can be inherited from parents.

Below the illustration, there are three columns of text, each with a header: 'NEAR RED', 'RED LILY', and 'RED'. Each column contains several lines of small, illegible text.

Clue 2:
Mouth
Width

Mouth Width Analysis : Measurements show that the width of the suspect's mouth spans precisely 4 inches when measured from corner to corner.

Clue 3:
Nostril
Size

Nose Analysis: The distance between the nostrils of the suspect is a distinctive 1/2 inch.
