

AI FUTURE TRANSPORTATION INNOVATIONS

In the future, AI could revolutionize transportation with flying taxis, hyperloop trains, and smart highways that communicate with vehicles. These innovations could make travel faster, safer, and more efficient.

Task: Using the prompt above, Draw and describe your own AI transportation innovation. Explain how it works and its benefits.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on the right side, suggesting it's resting on a surface.[illegible]
